Health Care & World Religions Series South Asian Hundus and Health Care Tuesday, October 10, 2006 (8:30a.m. - 12:30)

## ACHIEVEMENT OF PROGRAM GOALS

| 1. I have a better understanding of how the religions and cultural traditions of South Asian Hindu immigrants affect how they perceive and access health care.  |                                 |                |    |                     |   |      |               |

## Comments/Suggestions:

• Did not find the role play helpful. The older members of the panel seemed far more knowledgeable than Mr. Modi. Dancing and music were wonderful. I find myself a bit confused by Mr. Reuter's rather casual attitude about the removal of the crucifix from the wall of a Catholic hospital. Certainly the care reudered proclaims the Catholic faith but that care is not Catholic unless it is rooted in the love represented by christ's sacrifice on the cross. I am not opposed to making accomodations to make a sick person more comfortable and there may be times when it is appropriate to remove a religious symbol but one would hope that such removal would not be a

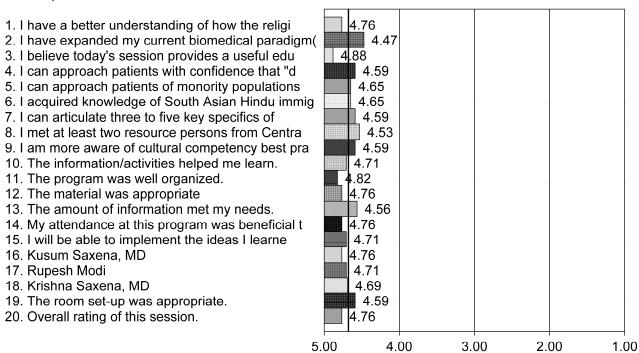

casual or trivial thing. In removing the crucifix would you then forbid staff to wear a cross when approaching the patient? Isn't this somewhat like the recent move by the French government to forbid Muslim girls wearing head scarves in public schools? It just seems like a more complex issue and I don't think it was treated that way.

- Thank you wonderful program!
- Well done! Very helpful
- It's cold in the room
- Suggest- each culture a list of contacts what that person can help with, phone numbers. For snack offer protein- cheese, yogurt, peanut butter, bagels, cream cheese.
- Thank You!
- Thank you for sharing dance of life and showing dresses

Please indicate future topics/speakers that would be of interest to you.
